VIEWING OF CATTLE

Cattle may be viewed Sunday November 13 at
10:00am

LOADING OUT

No cattle load out until after the conclusion of the
sale.

Welcome

Welcome all to the Fall Central Simmental Sale. There has been a real turn around in the cattle business. Calves are selling at record prices and breeding stock is in demand. This group of consignors are offering a great set of cattle from the hearts of their herds. Now is the time to cull old and unproductive females and replace them with young genetics. All of the consignors have up to date vaccination programs and preg. Checking will be done prior to the sale.

Best of luck with your purchases and enjoy the next several years in the cattle business. It is only going to get better.

See you sale day!
Glen Kerry

Terms and Conditions

Terms

The terms of the sale are cash or cheque, payable at the sale location. The right of property shall not pass until after the settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in case of dispute, the auctioneer's decision is final. Announcements from the auction block will take precedence over the printed matter in sale catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

Breeders Guarantee

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Simmental Association with regard to health, freedom from defects and both reproductive and specific genetic unsoundness.

Liabilities

All persons attend the sale at their own risk. The Central Invitation Simmental Sale and consignors assume no liability, legal or otherwise, for any accidents that occur.

Insurance

We strongly recommend that insurance is purchased for full value.

Certificate of Registry

Each animal will carry papers issued by the Canadian Simmental Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

Health

All animals in the sale have met all necessary health requirements.

Bids

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the consignors, auctioneer or sales staff. Bids must be received in sufficient time prior to the sale.

Errors

All announcements at sale time, written or oral, supersede any written material in the catalogue.

Tabatha Tardiff

Welcome

This year's message finds all of us in a more up beat mood as stong beef prices appear to be here for a while. Producers who endured the recent turbulent times in our industry can hopefully expect some stability in the coming years.

Now is a good time to analyze our herds and inject genetics which can build for the future. Cull prices are strong and therefore replacement female and herdbull purchases make sense.

Simmental can provide options for many commercial programs. The breed has a moderated frame, greater feeding efficiency and still those strong maternal traits which made Simmental renowned. The genetics offered through red and black purebreds and Fleckvieh/fullbloods provides opportunities for cross breeding in a variety of situations. The polled factor is available in all segments of the breed. These factors can make Simmental a strong possibility for your next herd bull. You can expect bull calves that make thick, growthy stockers and heifer calves that are keepers as herd replacements.

In closing, feel free to approach a local Simmental breeder with your breeding stock needs. Herd bulls, replacement females for your commercial herd or select females to start a registered program can all be found nearby. Semen and embryos from leading genetics are also available.

Businesses encourage us to shop local for a variety of good reasons. I suggest the same applies when looking for herd improving Simmental genetics.

Bernard Leahy,

President,
